

**CHINNOR TENNIS CLUB
ENVIRONMENTAL POLICY (2023)**

1. Law and Regulations

We will comply with local and national environmental legislation and guidance.

2. Energy and emissions

We will minimise our energy use and emissions by using LED floodlights and energy efficient equipment.

3. Transport

We will encourage our members to walk or cycle to the courts where feasible. Travel by teams to away matches will be in a single vehicle.

4. Water

We will minimise our use of water and repair quickly any leaks that should arise.

5. Consumables

We will re-use and recycle consumables where possible. We will minimise our use of paper through electronic communications and records and electronic banking. We will phase out the purchase and use of single-use plastic.

6. Light pollution

We will minimise light pollution by linking floodlights to the court booking system.

7. Biodiversity

While we have no responsibility for green areas beyond the courts we will minimise disturbance to plant and animal life.
