Floodlights

- The light tokens are in a tin in the alcove by the main door; each token provides 30 mins of lighting
- The token meters are adjacent to the alcove and all labelled (meters for courts 6&7 are behind the white cupboard door).
- Please only use the lighting you need; you can easily go back and add another 30mins if required.
- There is a red warning light on the floodlight post which shows when there is 5 mins of light left, so you can put in another token if required.
- If a floodlight goes out, please note there is a 15 min delay before it can be re-started as the bulbs need to cool down before being lit again, so don't get caught out!
