

Lower Windrush AGM Report 2024

2023 was a steady year for the program. Our numbers have stayed pretty much the same for the last couple of years. We continue to advertise and work with the local schools but have struggled to bring in large numbers of new players to boost the program.

We have always thought a big issue was not having an indoor area for parents and pupils to go to so with the addition of the cabin we feel this will start to help us grow once more.

We look forward to an Open Day later this year which will show the local community what we and the club have to offer and hopefully we can translate this into new players joining our coaching program at the club.

We continue to offer discounts for local teachers and school staff as well as bluelight workers and bluelight card holders. We also continue to work with an Oxfordshire initiative called YouMove which aims to get low-income families active together. We offer a 50% discount to families who are on free school meals or have a YOUMOVE card and again we hope this supports the local community and families.

We hope to increase the number of juniors in the program by the end of this year by adding in some new groups. We plan to start this process before Easter when the weather is warmer and people are more likely to take up any offers we put out.

We have high hopes for 2024 and look forward to putting into action the plans for this year.
