a coach for a string test now

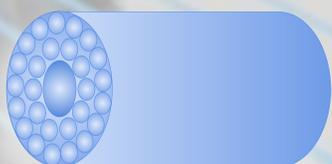

### **Halo 1 - Soft Poly**

A single strand string, which bridges the gap between a traditionally harder feeling poly and a multifilament. Arm friendly, good durability, medium tension maintenance.

### **Halo 2 - Hex Co-Poly**

A six sided string for excellent spin production, good power return for players with longer strokes, good tension maintenance.

### **Halo 3 - Synthetic Gut/Multifilament**

A central core string spirally wrapped which produces a powerful and very comfortable feel on contact, very arm friendly with medium tension maintenance.

### **Halo Four**

A poly mono string with the most aggressive spin production in the range, good tension maintenance, more arm friendly at lower tensions.

### **Halo Comfort**

A soft poly string that is ideal if coming back from injury or suffer with tennis elbow. Good tension maintenance, produces easy power - ideal to use as a hybrid setup.

### **Halo Touch**

A mid softness poly string for excellent feel with complimentary power for longer strokes, very good tension maintenance and durability.

### **Halo 7 - Next Gen Spin**

A premium mid stiffness poly string with very predictable spin production, good tension maintenance, and fast crisp response.
