

Plympton Lawn Tennis Club Environmental Policy

The UK Government has declared a Climate emergency, with an aim to be carbon-neutral by 2030. PLTC is aware of the importance of action to tackle climate change and the radical changes that are necessary. We believe a robust environmental policy will benefit the club and its members in the short and longer term. In essence, the tennis club will do all it can to ensure that our actions are not detrimental to the environment. This undertaking will be an integral part of all decision-making processes.

Plympton Tennis Club therefore pledges to:

- Minimise energy use and use sustainable suppliers where possible
- Minimise water usage and reduce any losses
- Minimise wastage in all areas such as consumables
- Maximise re-use and recycling where possible
- Minimise disturbance to wildlife and maintain or improve the local environment
- Encourage environmentally secure transport methods to/from the club and to away fixtures
- Minimise the impact of cleaning and maintenance materials
- Apply a policy of continual improvement with a periodic review of performance
- Support local environmental initiatives in the community
