With over 10 years of experience in sport lighting and more than 250 projects in Tennis court lighting (Indoor & Outdoor), amateur club to FedCup, NLX - Next Lighting eXperience has developed and patented the first LED lighting solution entirely dedicated to the tennis outdoor practice:

**Tweener®**  
Play tennis between the lines

**Exceptional Playing Comfort**  
thanks to great lighting performance

**Simple & Fast Installation**  
directly on existing grid structures

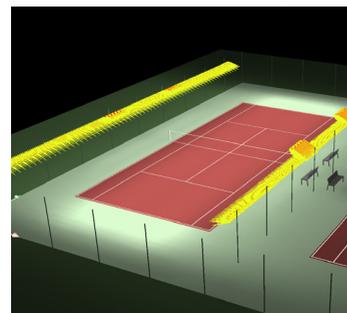

**Very Low Acquisition and Operating Budgets**  
compared to classical solution with masts

**Invisible Solution by Daytime**  
Thanks to fence integration

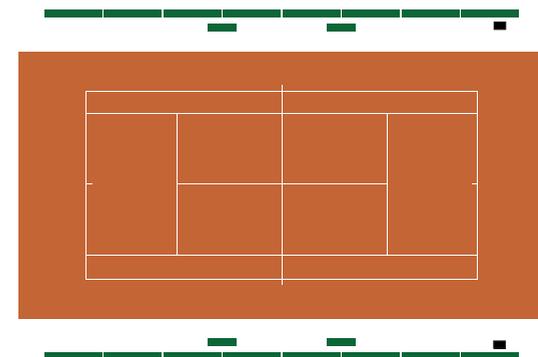

In April 2018, TWEENER® by NLX won the Innovation Challenge from the American Tennis Industry Association (TIA). Every users welcome this French lighting solution improving the quality of the game by night and helping the development of tennis clubs!

# Tweener® System

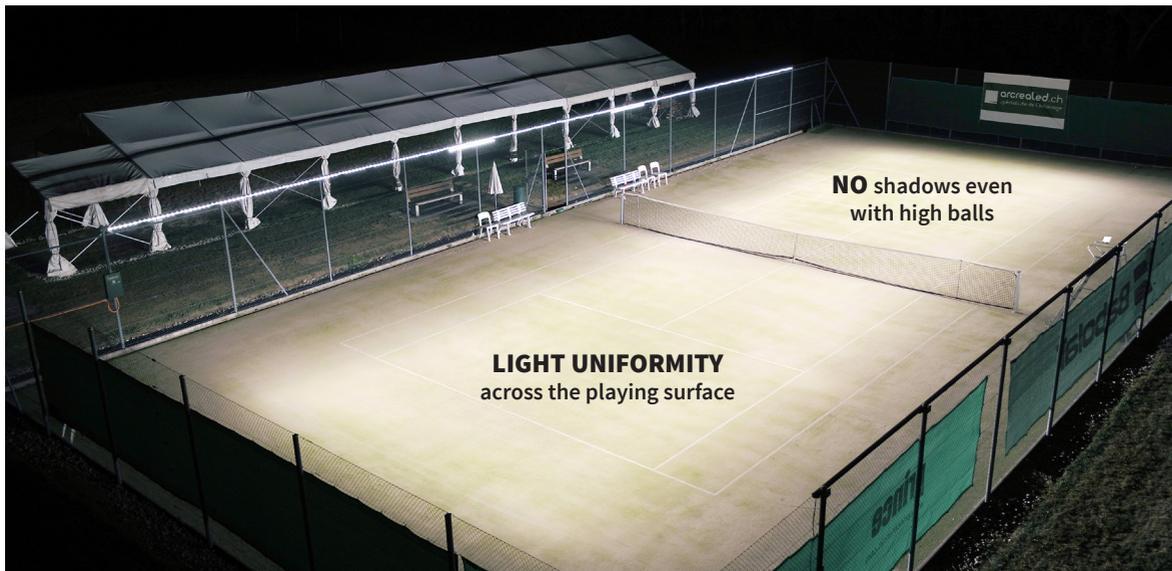

## TWEENER® KIT

- 20 pre-connected LED modules
- 2 power supply boxes with extensions
- Universal fasteners and screws
- 1 installation guide

# TWEENER® EXCEPTIONAL QUALITY OF LIGHT meets all the requirements of outdoor tennis ...

## The benefits of Tweener®

### Up to 50% savings

On purchasing, installing and maintaining your tennis court lighting.

### One day installation

Install, Plug and Play with no structural works!

### Clever linear system

Means no shadows even with high balls and cross court shots.

Tweener® provides an award-winning, patented tennis court lighting solution that cuts your purchasing, installation and running costs by 50%, thanks to its innovative LED technology and “plug-and-play” installation system. Tweener® is compatible with most outdoor court configurations including single courts, multiple courts, open singles or doubles. In just five years, more than 250 tennis courts in Europe have installed LED tennis court lighting from Tweener® – and now you can enjoy the benefits too, thanks to ETC Sports Surfaces’ partnership with NLX.

The result of two years of research and development and winner of the 2018 Tennis Industry Innovation Challenge in the USA.

## The Tweener® installation kit comes with the following components as standard:

- 20 x pre-connected LED bars (16 x long and 4 x short) with waterproof connectors.
- 2 x electrical supply boxes.
- A universal fastening system – suitable for most outside tennis court configurations.
- Easy-to-follow installation instructions.

Add to this a highly competitive purchase cost and low power consumption and you have the ideal solution for equipping your tennis courts with lights that guarantee optimal visibility in any conditions, whilst halving your floodlight installation and maintenance budget.

## How can I purchase the Tweener® LED tennis court lighting system?

ETC Sports Surfaces is the only SAPCA approved sports contractor authorised to distribute Tweener® in the UK. So, if you’re interested in transforming your courts with this game changing tennis court lighting, contact us directly.
